

THE SUMMIT LEARNING EXPERIENCE

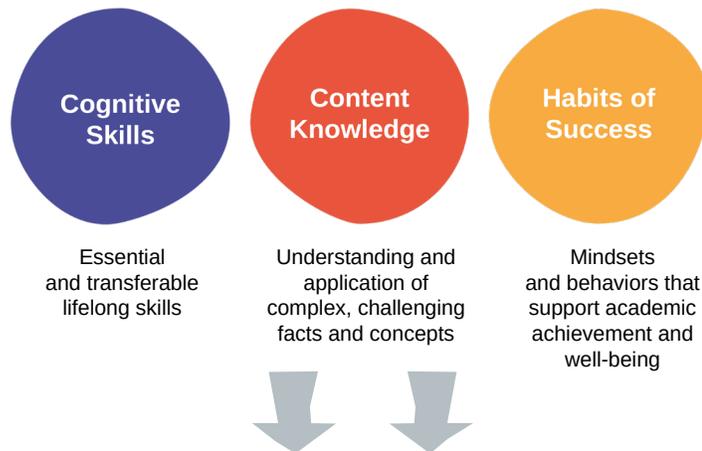

SUMMIT LEARNING IS A PERSONALIZED APPROACH TO TEACHING AND LEARNING.

Developed in partnership with nationally-acclaimed learning scientists and researchers, the Summit Learning approach gives students the opportunity to reach their full potential and provides teachers with the tools they need to meet the needs and interests of each student. Every element of the Summit Learning approach is grounded in what science tells us about how students learn best — from our student outcomes to the design of our approach in helping students achieve those outcomes.

SUMMIT LEARNING STUDENT OUTCOMES

Summit Learning is inspired by our **vision to equip every student to live a fulfilled life.** To reach that goal, we translated the science of learning into the intentional design of a school experience to achieve student success in three outcomes: Cognitive Skills, Content Knowledge, and Habits of Success.

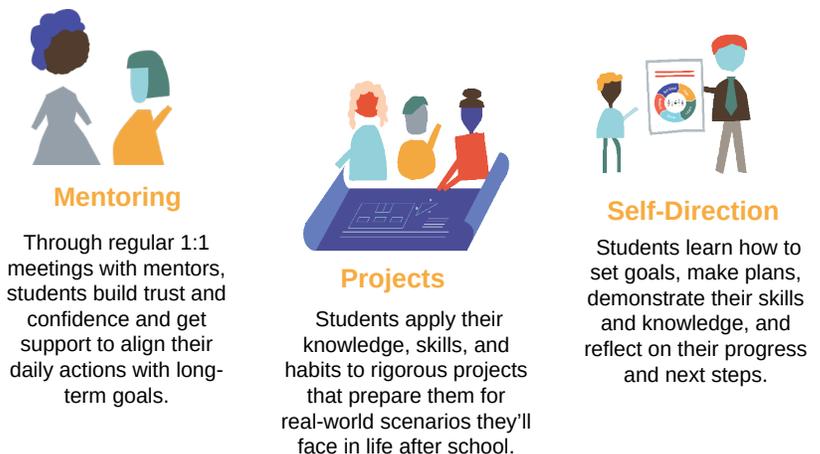

STUDENT OUTCOMES

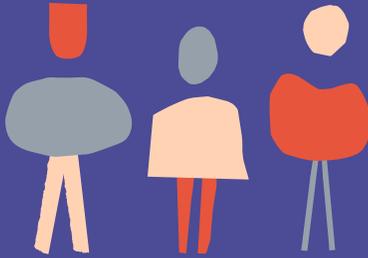

SUMMIT LEARNING EXPERIENCE

The Summit Learning student experience has three components: **Mentoring**, where every student meets weekly with a caring adult; hands-on **Projects** that develop Cognitive Skills; and **Self-Direction**, a continuous cycle that is built into every part of the day, from setting goals to mastering subjects.

SUMMIT LEARNING COMPONENTS

THE SUMMIT LEARNING PROGRAM

Through the free Summit Learning Program, we provide schools across the U.S. with the tools, resources, and training they need to implement the instructional approach in a way that meets each community's individual needs and vision.

THE SUMMIT LEARNING PROGRAM INCLUDES:

Curricula and Assessments

Complete, standards-aligned curriculum for grades 4-12, designed by educators, and customizable for each unique school community.

Professional Development

In-person and on-demand professional development and training for all Summit Learning educators.

Ongoing Support

Direct, one-on-one support from a dedicated Summit Learning mentor, and access to a nationwide community of Summit Learning educators.

Summit Learning Platform

An online tool that helps organize the different components of the instructional approach and supports collaboration between educators, students, and families.

THE SUMMIT LEARNING COMMUNITY

Schools in the Summit Learning Community collaborate and support each other at in-person professional development events and via online communities. See school success stories at summitlearning.org/participating-schools.

Our community includes:

- 72,000+ students
- 3,800+ teachers
- 380+ schools
- 76% district schools
- 18% charter schools
- 6% independent schools
